Petition to the Director (at no charge)
under 1.181(a)

Due to No Fault of My Own

Re: Please restore and provide to Me, at no charge, under 1.181(a), Replacements
of my six U.S. Patent Ribbon Copies (certified and sealed Duplicate
Letters Patents). My six U.S. Patents, each of which I am sole Owner
and sole Lawful Entitled, none of which Assigned, Sold or Transferred:

- 1) #6,776,618 "Method of Determining Zodiac Signs";
- 2) #6,974,325 "Astrological Charts and Plotting Devices";
- 3) #7,083,415 "Stars in Ecliptic Coordinates";
- 4) #7,195,488 "Astrological Tarot and Alpha-Numerology";
- 5) #7,236,952 "Invention in Finance"; and,
- 6) #7,357,638 "Astrological Horoscopes".

I have never gifted or donated any of these works, or any part, Invention(s),
or Divisional(s) thereof, or provided any express written permissions for
their utilization, commercialization, publication, or distribution. I have
never given any person any occasion or permission to have ever touched
any of my Ribbon Copies, USPTO correspondence or my Texts, Drawings,
archives, files, receipts (filing or mailing), photocopies or hard copies.

Dear Sir:

Due to no fault of my own, my Ribbon Copies of each of my six U.S.
Patents (listed above) were stolen/lost/destroyed by felons, not by me.

Petition to the Director (cont'd)
under 1.181(a)

Due to No Fault of My Own

In the period, 11/2008 through 12/2009, I, and my belongings, were viciously attacked in my home - an apartment I rented using my Section 8 Housing Choice Voucher (HUD), wherein I was sole tenant/resident/lessee/inhabitant.

Cruel sick trespassers invaded, illegally, my home when I was out, and, sometimes, at dead of night when I was asleep. I lived alone, had no friends or acquaintances, never gave anyone key or permission to enter. I am disabled/handicapped, deemed "gravely" disabled by Social Security Administration since January 2000. Evidence by SSA enclosed. I am very low income, with only SSI/DI (Supplemental Security Income and Disability Income) totalling \$865/month, to meet all of my needs. I am single, independent (by IRS and SSA codes), and live beneath poverty line. I am severely handicapped since birth, and it was not expected that I would survive childhood. It was believed I had genetic leukemia, as well as haemophilia. I sat in my room, and read. My siblings did not spend time with me, nor did my parents. I nearly died Summer 1978 of Guillain-Barre type paralysis and semi-coma. Again in 1979. And, by age 26, I was essentially disabled permanently from the general workforce, though before then, I had an exemplary early career.

In 1980, I interned for the United Nations Industrial Development Organization, Vienna Austria. I was Research Associate in Education and Manpower Training Programs. In the words of my boss, Mrs. Irene Lorenzo, I did "twice the work of all the other RA's combined, plus (mine) went straight to official U.N. print." In 1981, I did unpaid full-time volunteer service for our Nation, working, security clearance, as Jr. Foreign Service Officer equivalent for the U.S. Department of State, International Organizations, Economic Policy Unit, under Secretary Alexander Haig, Unit Director Lee Saunders, and Unit Deputy Director, Kenneth Yalowitz. I served with distinction.

I graduated from Wesleyan University, Middletown, CT (1983) majoring in Government and Economics. I co-developed, -designed, -and authored, economics first and vanguard work, under Economics Chairman, Dr. Peter Kilby, establishing cost/benefit analysis (1983), later published 1985 by US Agency for Int'l Development.

OFFICE OF PETITIONS

Upon completing cost/benefit analysis and structured work-out examples (including multipliers), I moved to West Berlin (9/1983) to begin my independent research project, (credit crisis of the Third World, for which I was awarded a Deutscher Akademischer Austauschdienst (DAAD) fellowship [w. Germany's Fulbright equivalent, but generally only awarded at graduate and post-grad levels, not undergraduate (I was the first Wesleyan alumnus in its 150-year history to receive one)]), and also attended graduate classes at W. Berlin's Freie Universität Berlin (Free University of Berlin). Based on rave success of my independent work, I was awarded the very rare distinction of a second year's Fellowship, expanding to the World Bank, IMF and Special Drawing Rights.

In Spring 1984, I began work, half-time, at Citibank Berlin, a five-officer corporate international boutique, as its financial statement and numerical analyst. Doing a sixty-hour a week job in less than twenty, I created and maintained a perfect book for Citibank, without any delinquency, late or missed payments, defaults or downgrades, during my two years there. Citibank Berlin was the finance arm of the Kennedy Berlin Airlift Mission. I was the only native English speaker, and non-German officer. Also, in 1985, I, single-handedly, as one-man team, defeated, in every banking performance category, all of the major German banking multi-person teams (them armed with laptops and mainframes; me with \$2 calculator) in that year's IBM-sponsored Bank Management Simulation competition.

I also consulted, 1985-86, for Wirtschaftsförderung Berlin (Berlin Economic Development Corp - a State-run industry-assistive operation), in Finance and Taxation (under Director Uwe Petersen), American corporations.

Finally, after my DAAD's ended (5/1985), I continued to independently invent, conceive, design, document and present multi-national composite currency (trade-weight balanced) to FU Berlin, Citibank and EDCB, which then later became, the Euro. I was, and still am, uncompensated for my invention.

Due to No Fault of My Own

OFFICE OF PETITIONS

During to recurring bouts of my illness, I returned to the USA in early 1986. I received the Marcus Nadler Fellowship in Finance from NYU Graduate School of Business, but retired after 1½ semesters from illness, which from then on kept me unable to maintain regular full-time schedules. With my girlfriend, we went to Rhode Island, then back to Pennsylvania (East side) where I grew up. I took up trade jobs when I could, played, composed and recorded a large body of novels, original music, and photography, over the next ten years. I maintained learning by reading and researching on my own, entire areas of human endeavors. I made over 200 songs, as private (unsigned) recording artist, some songs of which I registered for copyright (I have over 30 copyright registrations at the US Library of Congress Copyright Office - the certificates of which were stolen, as well), such as my "Agent Edgar-DeLuxe Archangel", my "Copies by DEAD", and "D'Zmura". All performance, recordings, composition, lyrics, instrumentalization are mine, alone. Never I have parted them, or signed or assigned any part or portion to anyone ever. All: unforged.

In 1995, it was announced that the International Association of Financial Engineers (IAFE), Exec. Dir. Dr. John Marshall, was to hold a special two-year Master of Science in Financial Engineering degree, the first of its kind in the world, to the highest, most demanding standards, supported by a \$2 million grant from the Sloane Foundation. The two-year program, under Dr. Marshall, Dr. A. Kolotay, and Dr. M. Dorigan, would be held at Polytechnic University, Brooklyn, NYC. I applied, and was provided full scholarship. Rigorous indeed: of 25 entry candidates, only eight of us walked across the diploma podium in June 1997. I graduated in three semesters, and finished atop of my class. My independent research project, on depository banking default and catastrophic loss in Property & Casualty insurance, was the only research professionally published: see my "Forecasting Expectations..." of 3/1998, CIFE (Computational Intelligence in Financial Engineering), IAFE/IEEE NYC. My work, comprising numerous inventions and improvements, forms a divisional group in my US Patent "Invention in Finance", whereby I duly filed timely

OFFICE OF PETITIONS

I was an original member of the IAFE, joining it in its initial year of inception, 1993, when I lived at 207 N. Main St Doylestown PA, in a tiny one-bedroom apartment, getting by as a part-time estate house painter and fine dining waiter. During my Summer vacation, 1996, between semesters in my M.Sc. FE program, I succeeded where Einstein himself believed no one could ever achieve it: I derived precisely, by differential calculus, Change with Respect to Time, also known as the Fourth Dimension, and, in physics and finance, as Duration. Further, I then also succeeded in solving, again by diff. calculus, its Change with Respect to Change, called Convexity. As Einstein postulated, and as I proved in my Formulae and Coded Algorithms, Duration is of negative magnitude. I submitted to USPTO, my first patent application, pro-se Independent, in 11/1996 of this invention group of mine, which also included further inventions of mine, an universal valuation mechanic enabling wholly industry-disparate financial instruments (fixed-income securities (bonds); equities; and insurance policies) to be comparatively valued. Also, my provisional filing of 11/1996 contains my Replicated Equivalent Primary Securities (REPS), its compositional process, and trading systems based thereon. In my first filing, I solved what Einstein and no one in 100 years of physics, mathematics or quantum could solve, as well as unite all types of financial securities under a single universal valutive framework, and made the compositional mechanic for portfolio hedging, immunization and arbitrage. As first, and with extraordinary value in finance industry, energy physics, light, quantum and field theory, I claimed, and patented (world's first patent of mathematical formulae and their coded algorithms) Duration, Convexity and universal valuation (also with energy industry applications) in my Patent # 7,236,952 "Invention in Finance", just one group of a dozen Divisionals within my grand conglomerate treatise, of which all inventions, text, drawings, authorship, prosecution, claims, rights and entitlements are mine, alone.

OFFICE OF PETITIONS

My "Invention in Finance" contains many important inventions in divers critical financial operations. For instance, my Ratios pertaining to safe/precarious indicators of depository bank solvency absolutely indicate, and, I invented them to assist the FDIC, our Federal Bank System, and Bank Risk-managers to track, detect and avert trouble. Instead, it was clearly infringed by Chase (several Poly FE's went to work for Chase) to identify, marginalize, collapse and absorb banks at risk. (No - I was not paid - in fact, I have never ever earned even a dollar, Euro or Yen, or Pound, for my works which constitute over half of leading-edge contemporary "rocket-science" finance - a multi-trillion dollar a year (US alone) industry). Add my 11/8/2007 US Provisional #61/001436 "Energy of Financial Instruments" (never published or sold by me - yet (copies) stolen) and it covers 3/4 (half of trading). Almost all valuation specialists are using my patented, claimed Algorithms in my "Invention in Finance" - full-scale, full-industry infringement.

During my Spring Break vacation, 3/1997, I penned out the central and crux hub inventions and inventive steps, and, the mappings of the outlying destination inventions, comprising my complex set of over 150 inter-related inventions solving empirically, and, in so doing, unifying every aspect of world astrologies, in my 3/1997 provisional. From among its dozen Divisional groups, from my US/PCT 00 and 5/5/2001, and 10/18/1998, I have patented five of the groups. Seven remaining. Of patented, the cloth of my prodigious treatise appears to be the field of astrology (in the words of Australian patent examiner, "you have created a monopoly on an entire field of human endeavour"). Yet, it is really my Astro Logic, which comprises astronomy, telemetry, coordinate systems, system conversions, near-Earth geo-locating, GPS, telecom, in addition to the solution eluding astrologues and astronomers for over 6,000 years - the locus of the division, wherefrom precise alignment of Northern and Southern hemispheres can be precisely known any specific day -

OFFICE OF PETITIONS

My patent, "Stars in Ecliptic Coordinates" # 7,083,415, moved near-Earth telemetry, Satellite and GPS into the 21st Century. Notice how fewer calls drop? My coordinate conversion process, from equatorial to ecliptic enables not just stars to be catalogued in celestial longitude and celestial latitude (essential to plot stars/constellations in astrological charts, or any solar system plot, themselves mapping planets in ecliptic coordinates, whereas prior art star catalogues map stars in equatorial coordinates of right ascension and declination, incompatible without my claimed and patented process), but to locate immediately, precisely and without numerous iterative steps or numerical approximation means, the specific pinpoint of Satellite to ground location (be it cell phone, tower, suspect vessel or vehicle) because Earth-ground locations (such as on a globe) are in geographical longitude and latitude, and hence, readily, simply, exactly convert to celestial ones. Hence, my patented process is the key inventive step for 21st century Earth to near-Earth telemetry, communications, GPS and high-speed identification (and low-use CPU with approximation error) of target. This is hugely important to our Nation's telecom, aerospace and security. Also, my process (I discovered on Internet) is grossly infringed, not just by gigantic-scale industrial, scientific and military operations, but by some unknown, unlicensed whole-sale patent and copyright plagiaristic rip-off book being sold to the public. No permission ever requested and none certainly ever granted by me. The plagiarist problem continues to ever worsen - my Astro patents, Class 434 Education and Demonstration, means every "Astrology" book coming out, every Blog, Chatlist, pseudo-astrologer, chart infringer, "Google book" whole-sale infringer (plagiarist, alone in my apt, sick, working weeks, or months, or years on end, by myself, for myself: pro-se independent, not in hire), but are perpetrating criminal patent class infringement - and the USA cannot allow this, for that violates our Nation, all PCT member Nations, and our Nation's rights.

Due to No Fault of My Own

I have worked over fifteen years on inventions, all at my own time, learning, thought, pondering, analyzing, refining, solving, discovering, writing and drawing, in my own home, privately (not a business, home office or business address), amidst horrible suffering, agonizing pain of very severe maladies (for over 40 years of my life mis-diagnosed), very alienating grave, acute, subacute and chronic maladies. I work by myself, in my own home, where, always, I have been the sole tenant, resident, inhabitant. Every year of my life since leaving college, I have lived alone, without roommates, relatives or associates. Every year, I have met the IRS and SSA guideline codes of independent - if also desperately poor. I have been handicapped since birth and disabled (gravely) per SSA since January 2000. Years 1996-1999 I scraped by barely financially with some part-time consulting, proofreading, house painting (none related to my inventions) to eek out a poverty-line existence, amidst knowledge I was very ill and unable to have regular job or pay. I worked extremely hard, persistently, and deliberately, (without supporter, collaborator, partner, co-worker, assistant or attorney/CPA/agent/rep/editor/co-party), because patent and copyright laws say I get paid ("All are expressly prohibited"). It is, was, and remains my ticket to economic independence, wealth and income. I have no income from my works. All are in multi-billion, and multi-trillion dollar (USA alone) industries. All are core, critical, important, fundamental and/or revolutionary improvements. My only Counter-Party is the USA government. I sent you my works. You properly assessed them bona fide, and granted me patents. USA and I are being ripped-off by infringers, and USA is being scapegoated or being made negligent in its law enforcement. USA is losing tremendous value, economic growth, leadership, world standing due to others' crimes.

RECEIVED

FEB 17 2011

Shortly after publication and my presentation of my "Forecasting Expectations..." Proceedings of CIFE Conference 3/1998 NYC, and coincident with my filing my PCT/US98 Astro, my mail, phone, any email have been constantly thieved, tampered, pirated, hijacked. By imposters. That was when I lived in NYC, 64 W. 82nd St #5F New York NY 10024. The phoned email pirating traced to an unknown stranger, named "Robert Soleby of Reston VA". Persons attempted murder on me, 8/1998. I reported it to US Attorney's Office and NYPD. US Secret Service came, and told me, I was being hugely embezzled, but did not tell me by whom, what money, where it was; nothing helpful. And so it's been with police here in California. In 3/2003, Deputy told me there were murder plots on me. No specifics, no protection, no advice. One month later, they began and have never stopped. I'm not a celebrity. I'm a quiet loner, at home by my self most of the time. I have no friends, and scarcely even know my siblings. Before coming to Cal., I had no contact with them for twenty years. Here, now eight years, hardly any - and never anything with them. Or any relative. I have no business, or business with relatives. Early March 2004, dead off night trespasser broke in and shot me point blank in the head (stungun?). Caused severe brain lesion and hemorrhage to my left claustrum. I called 911. No medical help came. Each year, I have a brain MRI. Each year it shows more and more maintainings being done to me by people shooting lasers in my brain. And everywhere else, causing horrible internal bleeding, brain pressure seizures, convulsions, paroxysms, transient strokes.

I have no heir, no spouse, no children, no beneficiaries. I leave nothing to my parents and siblings and relatives. They tried to murder me in 1968. Why? I don't know. I'm the only one with genetic disorders. Who are they?

OFFICE OF PETITIONS

You know so little about me - yet you are my Counter-Party. I have a large raised mole between my shoulder blades. Darkish blue-grey eyes. In 2003, I solved unified field theory. Proved it apparent. Corrected, making actual relations between the fields. $cm = Mc^2$. Never got to file, was attempted murder on, early 3/2004. Doctors said I'd die soon, no chance of walking or talking. I proved them wrong. Police were supposed to protect me, even APS (Adult Protection Services) from abuse/violence. No help. My writing "Free Energy" is partly disheveled to keep certain parts secret. (as well as my mathematics stating unified field theory, apparent relations and actual relations). It is my energy apparatus to power electrical grids - not nuclear, non-chemical, no by-products. Could save humanity. You never got my "Methods to Saving Life on Earth" (thieves tore it up and stole most chunks of it). You are dealing with anti-American terrorists, traitors to USA, and criminals against Humanity.

I have no money, no prospects (permanent grave disabled): please decide to:
A) Provide me Ribbon Copies and Duplicate Letters Patents on All My Patents (souvereigns)
- free of charge: Send Ribbons and Letters to Me Personally

B) Remove any and every Divisional and Provisional Patent Filing of Mine from Abandonment, and let me prosecute them free of charge
(I am not a small or large entity. I am a sub-poverty disabled/hand-capped.)

C) Advise the US Dept. Commerce, US Treasury and Executive Cabinet to License, for USA science, industry, technology and securities, my Intangible Asset wealth. It levers \$500 Billion in US Treasuries. The Treasuries would be Centarians (20 yr patent, ad life + 70 yrs copyright). The Treasuries would be owned by USA Federal gov, and retire to US gov. The Treasuries pay me royalty (perhaps 8% patent plus 4% copyright during term). The Treasuries are not "fiat", but backed by my vast Intangible Assets. The US Dept Commerce, Cabinet can decide as how to license different parts to whom. My 2003-present, and future, inventions can be included, with special provisions. The USA needs long long term Treasuries (these are minimum 70 years) and needs more solvency. USA industry, culture, science, military, space, GPS, telecom can be best in world. USA with multipliers will realize over \$10 Trillion within 10 to 20 years.

COVER

Dear Director of the USPTO:

This Mailing, certified as mailed this date, June 18, 2010,
by USPS Postal Service, contains:

A) Petition to the Director, under 1.181(a), Due to No Fault of My Own.
Eleven Sheets. Handwritten by me, in single-pass-draft. (Apologies).
Dated and Written June 14, 2010.

B) Supportive Enclosures:

1) Authentic Copy of Letter (two sheets) to me, from
Social Security Administration Date: May 28, 2010.

Documenting my Social Security Disability Income of \$329/month;
and my Supplemental Security Income of \$536/month,
comprising my total monthly income of \$865/month.

Said Letter (second sheet) attests "disability began Jan. 1, 2000",
signed, stamped and confirmed by SSA, Office Mgr., San Marcos, CA.

2) Copy of my Housing Voucher, 3/4/09, attesting "APS": victims of crimes.

C) "Please Advise U.S. Department of Commerce, US Treasury, and
Our President's Executive Cabinet".
Three Sheets. Handwritten by me, in single-pass-draft. (Apologies).
Dated and Written June 18, 2010.

D) Further Informative to c): my June 17, 2010 letter (two sheets) to
my Dept. Housing & Community Development, County of San Diego.
Handwritten by me, in single-pass-draft, to my CoSD case manager(s).

(contains Second Page: Front-End [re c]) and Back-End (civic swap my tax facility).

This Second Page Drawing, and d) and c) constitute my Business Method,
of my own pro-se independent invention and design, thus, Patent Pending.

All Rights Reserved. I have no License on Any of My Works, and not used my Facility.

Sincerely, David Andrew D'Zurra *David Andrew D'Zurra* pro-se Independent Inventor (us/us).

Title: "Please Advise US Dept. Commerce, US Treasury,
and Our President's Executive Cabinet."

David A. D'Zmura

Dear Director of the USPTO:

(wherein paying me annual in advance Royalty Interest)

In utilizing my works (Intangible Assets) to underwrite US Treasuries/Bonds (Tr/Bs) and, for US Federal leadership to assume license and to bear authority in full to sublicense parts of my works as best suited to the nature and industrial applications of the respective parts, the US leadership will have freedom from me. That is, leadership is welcome to inquire as to my thoughts or opinions on sub-licensing or distribution of licenses by parts, but has full and free authority to decide and direct implementation and specification to industry, scientific and/or National/State entity use + license, and sub-license, as it deems.

licenses
and retains
all earnings
therefrom

In converse, similarly, while the vast US Treasuries and/or State and Municipal Bonds that are underwritten by my works (which I estimate to ^{or exceed} approach \$500 Billion: 70 year to 100 year Tr/Bs), the Tr/Bs retire at maturity back to the US Treasury and/or State/Municipalities, that is, the principal face value is of, and for, the People of the USA. However, ^{converse} similar as to use-license, I shall direct and chief executive the applications and allocations and investments of these Tr/Bs, serving the Peoples' interests, our Nations' welfare, and our Economy's growth, security and development. I am a top professional in the field areas of industrial development, banking, securities and insurance, agriculture and nature preservation, and have at heart, sympathy and compassion to Americans of all walks, races, creeds, education and vocations, and am especially keen to utilize my executive and analytic, and constructive, sound comprehension, to solve and further our Goals. In so applying the Tr/Bs, I will consult and inform with US/State leadership, provide on-going status and routine reports, and save America millions in management salaries, middle-of-the-pack business leadership and blip, flat, or merger results, from the point-of-view of aiding and solving outstanding National and/or State/Municipal priority agenda items; this, coupled with an eye to highest standards of benefits over costs, creating and saving lives, jobs, welfare and standards of living of our People, and economic solvency of our Nation's governmental budgets, industries and localities.

David Andrew D'Zmura (US/US)
pro-se Independent Investor and Author
Ted Bell
page two of three

Director of the USPTO /USPTO

As indicated and briefly recited in my eleven-page Petition to the Director, I am extremely adept at top-end financial, economic, investment and industrial matters, both via education and by experience. I bring an added dimension to a new modest Tr/B facility, complementing our Nation's/States'/Municipalities' own, much larger, self-directed bond-pool resources. I have several important agenda items, which can be briefly cited herein, so you understand where and how I intend to direct the underwritten Tr/Bs. For many of these, they are pure Governmental, that is not-for-profit, but for survival and security, solvency and maintenance of civic welfare. For others, there is a for-profit environment, hence, my Tr/Bs take a stake, albeit at discount or near-to-zero immediate per value, but with the mode to up-value the industry-sector by capital infusion, to which, in addition to my set Royalty/Interest per annum on the Tr/Bs, I may earn value as my methods and leadership ascend value of the target industry and/or major US public-listed corporation(s) needing or requiring bail-out, solvency infusion, to secure our People:

Example Investments (not in express rank order)

I am top
champion banker,
and World's top
Financial Engineer

A) \$50 Billion in SEC bail-out (in addition to any other US/State funds) where, after analysis, zero-net or negative net value SEC assets are received, in return for future earnings, recovery, recoup thereon;

I will structure
this facility as
a AAA bank.

B) \$150 Billion State of California Budget Deficit Termination (and Return to Solvent Investment-Grade) as the World's sixth-largest bordered Economy, and at sub-investment grade, this State, and our Nation are gravely imperiled by this current, growing, unabated deficit boondoggle. In return for cancelling its deficit, California can pay my Royalty/Interest for that position (of the \$500 Billion) - greatly less than current deficit maintenance.

This Step
Saves
Nation and
US of Treasuries.

As long as:
a) State California
and
City Indian Wells
Sponsor BNIP/Lotteries
b) tournament California
repays Indian Wells
its Bonds for Stadium
c) I get steady side
low front base suite
for life

C) \$15 Billion Salton Sea clean-up and Anza-Borrego State Park Recovery/Preservation: following on my de-salination, de-contamination, and termination of deadly single-cell algae blooms, which I presented to Congressperson Mary Bono-Mack over six years ago by letter, I would employ distributed de-salination ^{stations} equipment (prior art 40 years of UNIDO and USAID), coupled with UV single-cell extermination, whereby the water de-salinates, contaminants adhere to extracted salt crystallizations, fish and migratory birds again flourish, air quality from Joshua Tree to Mexico greatly improve - aiding human and animal life and health, and, greatly showing up property values throughout Coachella Valley and NE County SD, County Imperial, County Riverside, County San Bernardino and Anza-Borregos.

Without
changing
size of
Salton Sea

And
\$1.5B in
wildfire fighting
equipment,
standby trained
manpower.

And
\$1.5B in Aid to
California State Parks.

And
\$1.5B additional Rural
and State Hwy Law Enforcement

Example Investments (continued)

OFFICE OF PETITIONS

D) \$35 Billion Ocean Water De-Salination to Human Potable Standards for City of San Diego, County of San Diego, Coastal Cities SoCal, etc. To form methods and model extensible to Los Angeles County (Coastals USA). There is not enough water in the Colorado River to quench Coastal Southern California. The Nations of UAE, Qatar, (and Kuwait and Saudi Arabia in part) de-salinate ocean water to Human Potable standards (prior art equipment UNIDO, USAID et al.), including fully all water needs for drinking, bathing, washing, agriculture. UAE and Qatar have the highest per Capita Income / Standard of Living in the World. Our SoCal Cities (esp. SD) need to start up now.

We are surrounded by Atlantic and Pacific and Gulf Oceans. 75% of our population lives within 15 miles of Coastal Water.

Clean-Up ASAP Saves USA

E) \$15 Billion Gulf Clean-Up funds, to engage now-unemployed fishermen, national and regional persons to pro-actively clean-up the oil spill damage, hurricanes, wildfires, as soon as possible, and into the middle-term, to stem habitat death.

Averts major meltdown. Recovers/saves substantial resources. Secures our posterity and accommodates growth

F) \$25 Billion Displaced Worker Public Works Programs, aiding and training and providing yearly work to unemployed, esp. auto and Gulf industry, UGW, workers. PWP's include training, and checking and repairing, identified/ying failing / failed equipment, leaks and losses, juncture points, lines and pipes of USA's (nation-wide) electrical, water, sewer, gas utility systems thoroughly, point-to-point, whereby, end-effect, greatly reducing system loss, overload, thereby reducing production / distribution to meet demand, lowering resource usage and utility costs. Includes check / fix of homes and businesses.

150 year Energy Needs Met Nationally - Oil Free - Nuclear Free

G) \$25 Billion Set-Aside to Build up Oil Reserves on Hand Nationally; while, develop and implement clean-coal powered electrical grid plants.

Specialty Interest of Mine

H) \$25 Billion Southern and Western Sunny-Sky Solar Electrical Arrays.

Excellence in Prior Out Performance in New Technologies

I) \$25 Billion Auto Industry Capital Injection, to Revitalize Industry / Solvency. J) \$15 Billion Best and Brightest. Full Scholarships through to Doctorates, so long as rigorous standards of achievement are met; in Voc-tech; B.Sc.; M.Sc.; Mathematics; Natural Science; Biology; Chemistry; Medicine; Engineering.

recovers much owed money, balances current cycle years

K) \$10 Billion Law Enforcement Public Works Programs - expressly North American Border patrol, US private and Regional Airports, Trains and Bus Terminals; IRS Audit Agents (Federal and State / City) and Coordinated Tax A.Dist. Attorneys.

Not "credit score" or "reported income"

L) \$75 Billion Fannie Mae Mortgage Facility based on bonafide, bonded escrowable mortgage payments, in default, such as Pensioners, Disabled / Handicapped, Veterans Beneficiaries, long-term salaried employed - direct deposited into escrow.

"go to relief" stopper

M) \$50 Billion US Treasury "13th Mar" to Fed Reserve Bank 12 EB Dutch Auctions, all or to gap short-bridges, purchase out newly issued, supplement shortfall auctions. FINI

I regret no operative, safe, computer, still.

Re: Unexpected Mailing and Call from Your Stated Representative,
"Sr. Petitions Attorney Steven Brantley" (unknown to me).
which I fathom is towards expediting my 37 CFR 1.181(a) 6/14/10.

Dear Madam or Sir:

Following on my unexpected receipt of mail to wards
of 37 CFR 1.182 and 1.183 I had not filed or authorized,
nor expressly
nor mailing of its alleged date, June 25, 2010, and
following on my message stating such to named USPTO
Petitioner Attorney Brantley (no prior knowledge / acquaintance),
Mr. Brantley phoned me, 1/3/11, and represented that
my actual Petition filing (copy enclosed) 37 CFR 1.181(a)
of 6/14/10 had been his the basis of his 12/10/10 letters,
hence, is my case of 6/14/10 37 CFR 1.181(a), not of any
other party, for none was/is mentioned anywhere on
document 12/10/10, none mentioned in phone call from
Mr. Brantley, and, none permissible by Law, or by me.

I would have appreciated a direct response to my
37 CFR 1.181(a) which I never received. Also, not mentioning
my actual Petition in his letter ^{was} confusing, for I never
Petitioned under 82 or 83, or lettered to USPTO 6/25/10.

I understand in speaking with Mr. Brantley that I can
file under 82 (for instance re Ribbons and Abandoned, supplying
\$400 there-with, if not by 2/11/11, then sometime later when
financially feasible for me. I regret our crossed references,
causing unclarity and disunity of intent in forging solutions.
etc.

Re: Your correspondence, stamped Date Mailed 12/10/10
Responding to My Petition Enquiry on my Patent
US Patent # 6,974,325
Title Astrological Charts and Plotting Devices.

Charles Steven

Dear Sr. Petitions Attorney Brantley,

Thank you for our telephone conversation today,
and for clarifying your correspondence, 12/10/10,
based off my 37 CFR 1.181(a) Petition to Director,
marked by me "Due to No Fault of My Own" 6/14/10,
moreover, for clarifying 37 CFR 1.181(a) relates
only to remedy of Fault Due to USPTO or USPTO
error. My opinion, that is not the case concerning
my Patents, filings, Applications and Concerns. I was
not aware of the specific limit re 37 CFR 1.181(a),
and appreciate your information in that regard.

I understand and thank you for your advisement
that lack of Ribbon Copy does not impact or reduce
my legal rights and entitlements, nor does it bestow
any on other parties. I am, was, pro se Independent
Inventor, sole Inventor, Applicant, Author and Owner my Patent.

January 3, 2011

David Andrew D'Zurra us/us

Attn: Sr. Petitions Att'y Brantley pro se Independent Inventor/Author
USPTO, Petitions Office
Alexandria, VA 22313-1450

page two of three

Thus, it is of No Fault of My Own, and of no harm to me, if other parties incorrectly construe my lack of Ribbon (copy), or another's holding of stolen/destroyed Ribbon (copy) as vesting or shifting any manner of Rights and entitlements. Further, as 37 CFR 1.181(a) has limit towards USPTO as to No Fault of Its Own, then, as pro se, categorical reflexive, merit of my Petition under 37 CFR 1.181(a) can stem in case due to No Fault of My Own. My opinion, this logic, and circumstance, holds. For, as you mention, in matter of Unavoidable versus Unintentional, a general proof against Unavoidable respective withdrawal of Abandonment occurs should Patentor pay Maintenance Fees, yet choose not to move forward open file Applications, resulting in their subsequent abandonment. But, here, the measure would be - to choose - with further implied that Patentor had more funds discretionary at the margin to continue prosecution but elected not to do so. In neither case is/was that my circumstance. First, a Patent lapsed in Maintenance past grace surcharge virtually cannot be petitioned into re-existence/inforce, such that, there is no choice, Maintenance must be paid having no Petition umbrellas, whereas Abandonments (Divs, Apps, Provs) do. Second, I had no other money at margin, in fact, went without to pay Maintenance.

Attn: Sr. Petitioner Atty Brantley
USPTO, Petitioner's Office
Alexandria, VA 22313-1450

January 3, 2010
David Andrew D'Zuruk us/us
pro se Independent Inventor / Author
Page three of three

Sincerely, ~~David Andrew D'Zuruk~~ David Andrew D'Zuruk
In the past few years, I have met, in surcharge grace,
the first four issued of my Patents, including \$555 I paid
in my mailing 12/8/10, the fourth. It took six months
to save, while wholly foregoing any expenditure other
than housing, food, medicine, and the case, for years.
I, today, have \$9, and my SSITDS each month of \$865 is
due me. For instance, my housing (with utilities) costs
about \$450/month, my medicine nearly \$200, food adjustable.

The only other Party, potentially with Rights and Entitlements,
as I see and wrote, 12/09 through present, including 12/8/10,
in my so-named "O/CPLT" (Our (USA DJ) Counter Party
License Transaction), is the USA Commonwealth, if and as,
US Agencies undertake contractual specification with me,
as I availed, and payment to me - which may be lawfully
grantable to calendar year 2010, if not earlier, 2009 or prior.
That is a matter I have not heard or received specifics, offer,
contract. My O/CPLT filing, I sent to Director, OIPE, ODM,
and to US Dept. State, Treasury and IRS. All resides here, otherwise

I take to heart, your indication that stepwise approach,
paying of \$400, for instance, is one Ribbon replacement, or
fee plus relevant Application fees for a specific Abandonment,
is a valid manner - esp. if Patent has the money to do so,
or - only if - My 6/14/10 states some background. If, as,
neither USPTO or myself are expressly at fault, as appears,
then 37CFR 1.181(a) stands in my favor, without your fault.
Further facts may prove that further, if needed. I do not have
\$400 today, but hope to save, within 2/16/11. ~~David Andrew D'Zuruk~~
